

Hi, I'm Climate Toothpaste. I want to connect you with climate advocacy groups in your area. A lot of people are concerned about climate change, but feel overwhelmed by the problem, and they don't know where to turn. **Good news:** amazing groups are already working on solutions! I'm here to help you learn about these groups, so you can find a fit.

Here's a text you can use to introduce yourself:
I'm concerned about climate change and am learning how to be involved with climate solutions/carbon pricing initiatives/conservation. Can you tell me about your group and what you do?

WISCONSIN

Pricing Carbon

Citizens Climate Lobby
www.citizensclimatelobby.org

Citizens Climate Lobby is an international organization trying to pass legislation for a national carbon fee and dividend. What's missing from climate change? Political will. CCL creates that political will by educating about climate change. CCL has 22 different chapters throughout Wisconsin.

Climate/Environment

350.org www.350.org

A global grassroots climate movement that holds leaders accountable to the realities of science and the principles of justice. Through online campaigns, grassroots organizing, and public actions, 350

brings together a global network in 188 countries. 350 has groups in Milwaukee, Madison and Stevens Point.

Climate/Environment/Conservation

Sierra Club
www.sierraclub.org/wisconsin/local-groups

The John Muir Chapter is the Wisconsin branch of the Sierra Club, and includes over 15,000 members and supporters located throughout the state. The John Muir Chapter's conservation priorities are: moving from coal to clean energy; moving from oil to clean transportation; blocking destructive mining; and protecting water, native forests and wildlife. The Sierra Club has six local groups in Wisconsin.

Other Wisconsin groups: Almost 40 other Wisconsin environmental groups are listed on this website: <http://www.eco-usa.net/orgs/wi.shtml>

Climate Mobilization

The Climate Mobilization
www.theclimatemobilization.org

Climate change presents us each with a fundamental choice. Will we be passive as civilization slowly collapses around us? Or will we mobilize and fight back for a 100% clean energy future? The Climate Mobilization believes we need a WWII-scale national mobilization to fight climate change.
